

# Fullstack Developer @ Nutrinomics

## **Nutrinomics, a startup to revolutionize Precision Medicine Through Nutrition**

Nutrinomics is on the ambitious mission to improve chronic patients' health and chances of remission, starting with cancer, through Precision Nutrition powered by cutting-edge Science & Data Science.

Through the personalized nutrition platform Zest, patients have access to weekly personalized recipes, recommendations and online shopping lists, always updated based on their latest health information.

### **The opportunity**

As FullStack Developer, together with the Lead Developer & the Product Manager, you will be responsible for bringing our food recommendation algorithm to the next level and improve our web patient nutrition platform based on patient feedback and behavior.

### **This includes the following missions:**

- Participate in the technical design of the solution based on patients' needs and business strategy
- Participate to the definition of the Product Roadmap based on the technical requirements & development timeline
- Implement the necessary feature changes on the front & the back-end (questionnaire, recipes, delivery popup, ...) using Sprints
- Ensure high-quality code through unit testing, etc.
- Collaborate with other developers and review their code
- Work on app performance
- Redact technical documentation

### **Your Profile**

As a growing startup, we are looking for analytical & creative minds, excited about our mission and looking for an impactful job. Even if you don't tick all the boxes, reach out!

- **Experience with NodeJs, Angular, and NOSQL databases (MongoDB)**
- Bachelor, Master or any relevant background in computer science
- Min 3-5 years coding experience
- Experience with Machine Learning is a plus
- Strong team player and eager to learn
- Goal-oriented

- At ease with a startup-oriented, agile and fast-paced environment
- Excited to be part of a growing, impactful company
- Languages: English (professional level), French is a plus
- Preferably based in Brussels

**We offer**

A fulltime challenging job with responsibilities in a growing startup, incubated in the imec.istart accelerator.

Partial homeworking and flexibility.

**Contact:**

**With resume (or LinkedIn profile) + small intro paragraph by email to:**

**Stephanie Roland/CEO**
